

DUAL-BEARING REEL

ABSTRACT OF THE DISCLOSURE

Dual-bearing reel, onto which a harness for tying to an angler is attachable, is equipped with a reel body, a rod mount, harness clips, a spool, and a handle. The reel body is coupled to a fishing rod from below such that the reel body is disposed beneath the fishing rod during use. The reel body is furnished with a mounting pod on top that is coupled to the fishing rod. The harness clips are furnished on the rod mount side of the reel body 1, and engage the harness removably and reattachably. The spool is rotatively carried in the reel body. The handle cranks the spool. For dual-bearing reels attachable to a harness for tying to an angler, relieving the burden on the angler when using the harness.
